About Company

Know about Desol Int. A place where we grow business for our clients; by following creative ideas, perusing high-end development skills and offering solutions that create value and reliability to develop competitive advantages for the client all over the globe market!

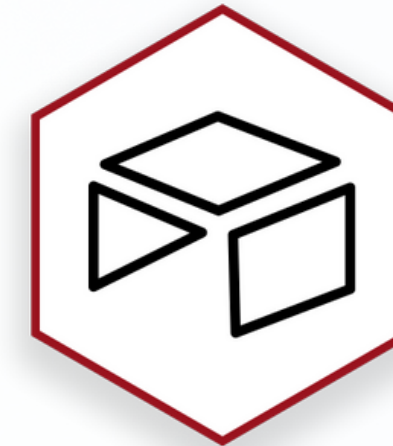

Our Services

Wordpress

Web Applications

Airtable Architecture

Forms Development

**NoCode/LowCode
Automations**

APIs & Integration

WordPress

We have an in-house team of Web Developers & design experts. We offer WordPress custom solutions, website development, eCommerce websites, on-demand projects, and extensive WordPress customization.

- API Integration & Customization
- Custom WordPress Development
- WooCommerce Development
- WordPress Form Creation & Automation
- WordPress Plugin Development
- Support & Maintenance

Web Applications

Desol Int. openly collaborates with ambitious startups and companies to plan, build, and grow tech products. Our partnership goes far beyond delivering features; we make sure we solve the right problem and build a product that brings true value to users.

- Dashboards
- Bespoke CRM & ERP Systems
- Login Flows
- Customer Portal Software
- Operational Systems
- Business Management Applications
- Ecommerce Applications

Airtable

We help entrepreneurs, start-ups, and enterprises build the tools they need to manage and automate their business operations using Airtable. We are Make (formally known as Integromat) Certified Experts specialized in marketing automation, workflow automation and custom apps built on no-code platforms.

- **Data Visualization**
- **Process Automation**
- **Airtable Integrations**
- **Data Synchronization**
- **Reporting**
- **Mobile App**

Forms Development

We automate online web forms with progressive workflows using different CRM platforms. We control all forms of automation solutions like assigning tasks when the form is submitted, and integrating the form with 3rd party CRMs and APIs and we also optimize lead generation processes by creating funnels and campaigns.

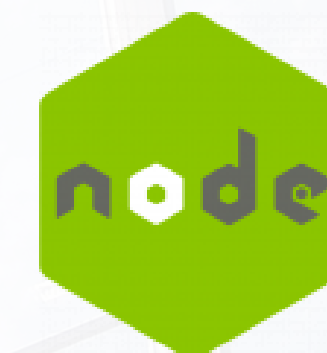

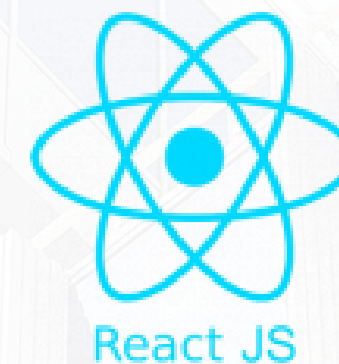

- **Education Forms**
- **Business Forms**
- **Charity Forms**
- **Registration Forms**
- **E-Commerce Forms**
- **Healthcare Forms**
- **Evaluation Forms**

APIs & Integration

We have expertise in a large variety of APIs using SOAP, REST, and XML-RPC as well as JSON and other protocols. We also help develop APIs for mobile, and desktop browser apps, databases, and intranet systems.

- API Integration Services
- Custom API Development Services
- API As A Service
- Automated API Testing Services
- Cloud Integration Services
- Microservices Consulting Services

NoCode/LowCode Automations

We automate processes with minimal or No Coding and do awesome integrations. We are your experts in building automated workflows by connecting and integrating popular services. From messengers, emails, socials, spreadsheets, Airtable to CRM, CMS, marketing, task trackers, and support systems.

- Custom Apps And Scripting
- Interface Development
- Automation and WorkFlows

Our Process

Website Portfolio

Case Study

Fleet Management and Logistics System

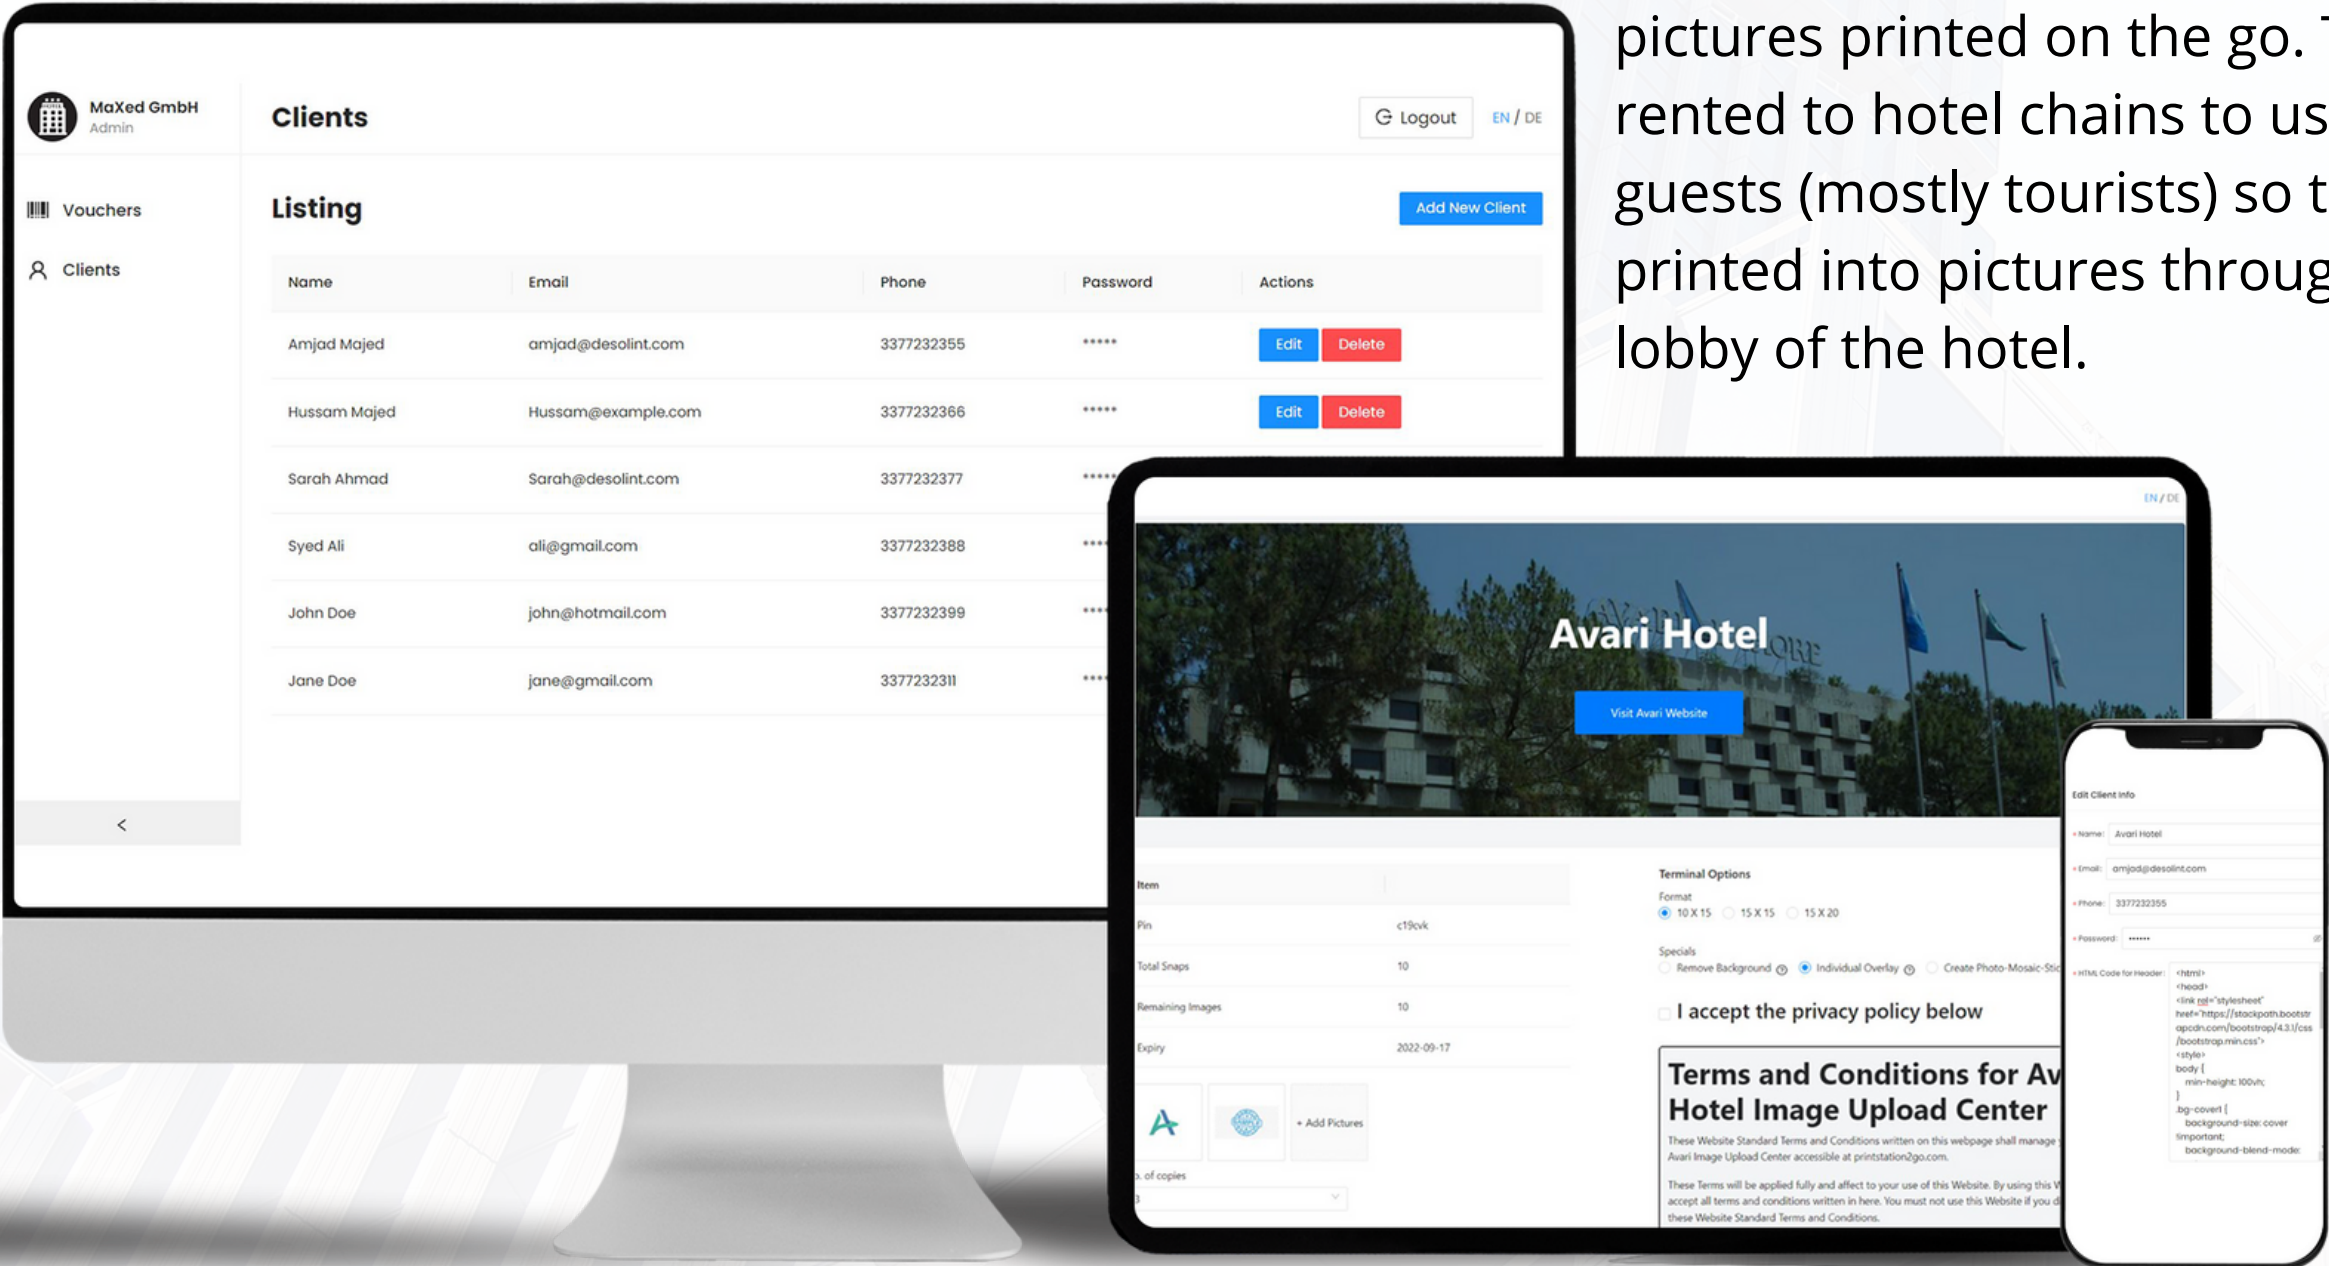

A custom web app was created for an ambulance dispatch company to improve its operations by addressing challenges such as real-time tracking, communication, visibility, and lack of centralization. The app eases dispatch and provides real-time location tracking and a centralized system for managing operations, resulting in an improved system. The client was satisfied with the final product and gave positive feedback. The solution addressed the challenges and led to a more effective and streamlined service.

Case Study

Memories Printing Platform

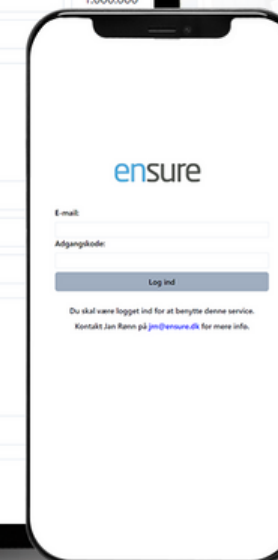

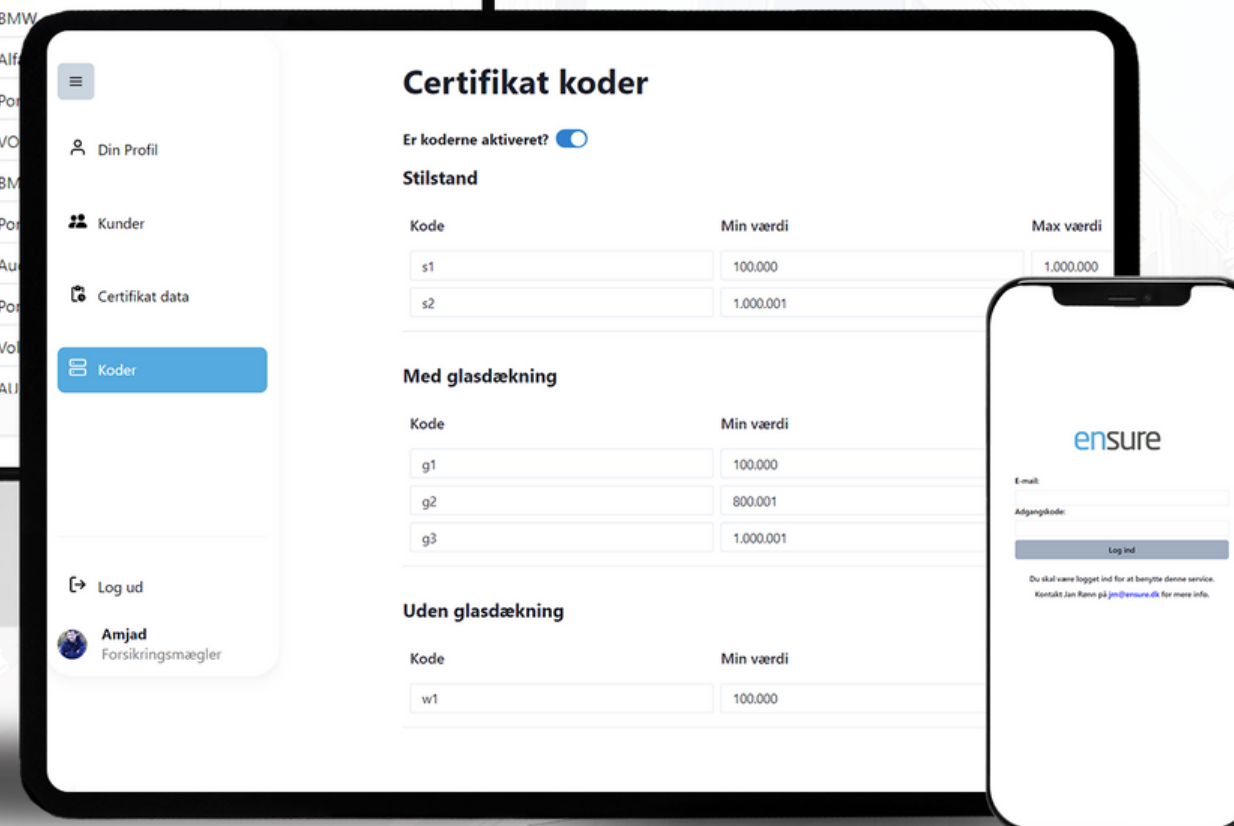

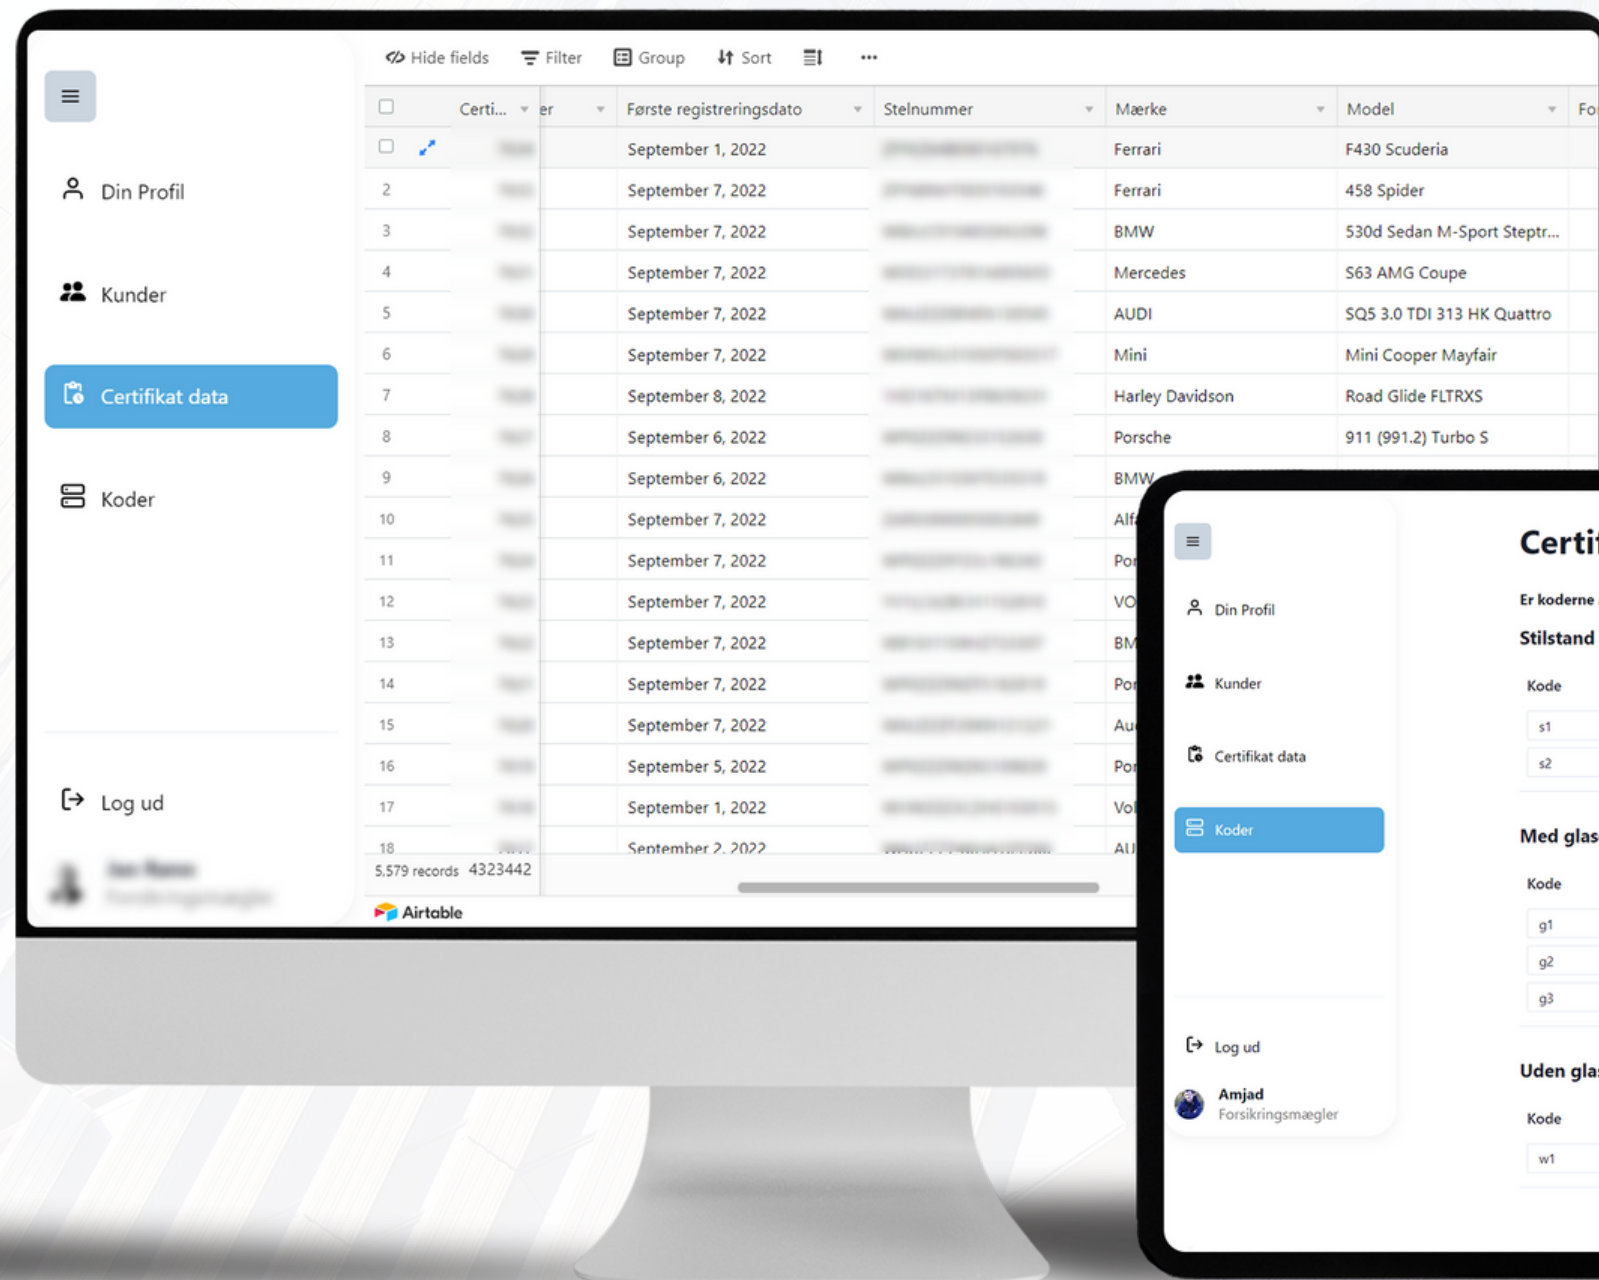

We have created a web application for a hardware-based company. The physical product is an image printer given (rented) to users for private parties so they can convert their digital photos taken with their smartphones into physical pictures printed on the go. The hardware printer can also be rented to hotel chains to use to offer coupons for their guests (mostly tourists) so they can have their memories printed into pictures through the machine present in the lobby of the hotel.

Case Study

Insurance Certificates Reselling Platform

We created a web application for an insurance reseller who sells insurance plans for vehicle leasing companies. They needed a system to easily generate insurance certificates for their subscribed clients to ease the process of generating and retrieving the data.

REVIEWS

Updating Wordpress website

★★★★★ 5.00 Jun 23, 2020 - Jul 19, 2020

"Sarah made my website exactly as I wanted and made it easy for me to let her know what I needed and she made sure everything was done exactly as I asked. Thank you Sarah, I will definitely continue to rehire you and recommend you to others."

Private earnings

Website development

★★★★★ 5.00 Mar 13, 2021 - May 30, 2021

"Absolute pleasure to work with Sarah. She was very receptive to my needs, easily accessible. Good on communication and did a great job. Whoever has seen my website have praised the esthetics and quality. I see myself working with her again in future with similar projects."

Need WordPress developer with experience working in Divi and Gravity Forms to create a couple forms

★★★★★ 5.00 Feb 14, 2019 - Feb 15, 2019

"I needed a WordPress developer who has the ability to create quality forms with Gravity Forms. Sarah came through with a high-quality product. Not only did she communicate clearly, she got the job done fast and provided insight and expertise that I don't have. I would greatly recommend hiring her."

This team does a phenomenal job. It is obvious that they possess both the skill and talent required for development and design work. They went above and beyond to ensure the project's successful completion in a timely manner, and I have 0 complaints about their efforts or work. It was a pleasure working with them and, when I need similar services in the future, I will not hesitate to call on them again. [See less](#)

Incredible! I feel I am very well versed in Gravity Forms, but Sarah is truly a professional. I hired her for a seemingly complex design that I could not figure out, and she pulled it off perfectly! I plan to use her again on future orders. As a side note, I spoke with about 10 Fiverr sellers focused on forms, and Sarah is by far the most professional and capable. She is not pushy but makes herself available to answer any questions or concerns you have. This made the ordering process and communicating with her while she was working very seamless and enjoyable. Wow! Simply a great company

Wow! Desol Int. Is simply the greatest company to partner with. I've partnered with them on several projects and they always go above and beyond. Everyone I've interacted with at the company has been super nice and professional. They are great at communicating to keep the project on time (which is important considering the time differences) and can provide great feedback. Most importantly, they are brilliant. Anytime I have a problem they ALWAYS have a solution, which makes my life so much easier.

I highly highly highly recommend Desol Int.! Thanks for all you all have helped us with 🙌

Outstanding Quality & Performance

I am very positively surprised. I did several projects with DESOL Int. They are listening, asking the right questions and the quality - output they are delivering is outstanding.

Sarah coordinates and is the single point of contact. no matter what it is design, graphics, website, app - she takes it and solves it.

Congratulations! Well done!

*****5 STARS*****

I really enjoyed working with Sarah. Sarah created a website for my Property Management Business and it is amazing!!! She also enhanced my business logo- I was pleased with the very first product!! It was perfect! She was very patient with me and also provided detailed videos on how to update the website. I would definitely recommend this company and continue to use them. Thank you so much Sarah!!!

I've been working with this company for 6 years

I've been working with this company for many years and they always go above and beyond to get me the results I need. I've had other developers tell me that what I want was impossible and when I ask these guys they get it done, no sweat! They communicate well, are patient and totally invested in getting their clients results. As a returning customer who is always satisfied beyond expectation I would recommend them in a heartbeat!

Complete and absolutely fantastic...

Complete and absolutely fantastic service! Sarah put me in touch with her colleague, Amjad, who with his technical skills listened and challenged my requirements for a custom platform we already had from another company, but which due to lack of maintenance had to be replaced. Throughout the project, Amjad has provided a fantastic service and responds almost every hour of the day. Will 100% use Desolint again.
